

z/OS Open Source Guild Meeting #7

Feb. 22, 2023

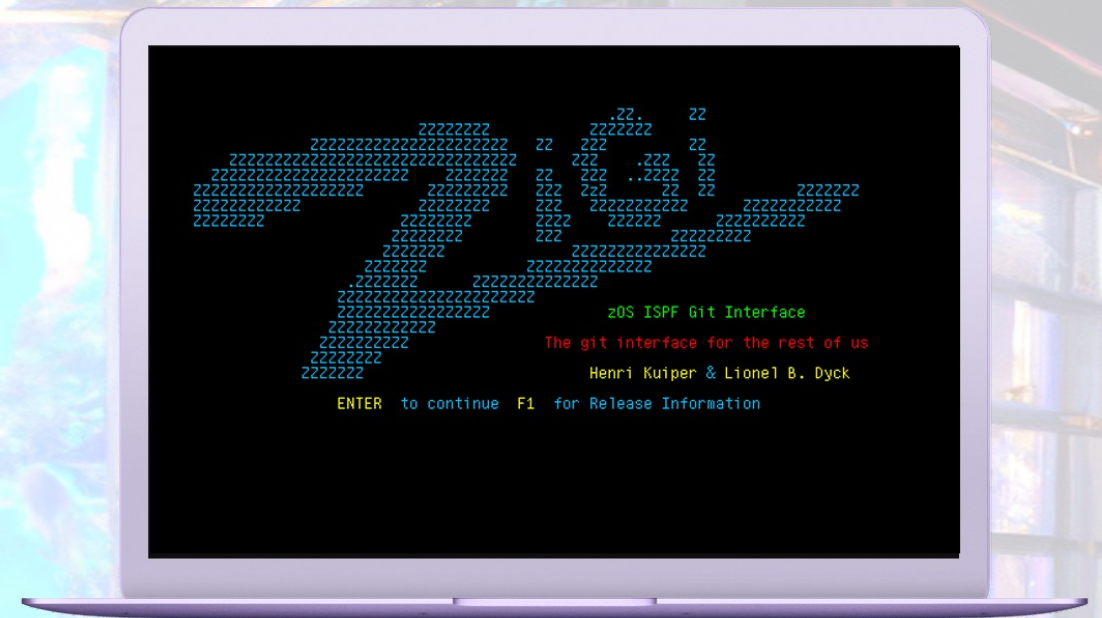

Lionel Dyck
(lbdyck@gmail.com)

Igor Todorovski
(itodorov@ca.ibm.com)

Haritha D
(harithamma.d@ibm.com)

Mike Fulton
(fultonm@ca.ibm.com)

<https://github.com/ZOSOpenTools>

Zigi – Open Source z/OS ISPF Git Interface

Agenda

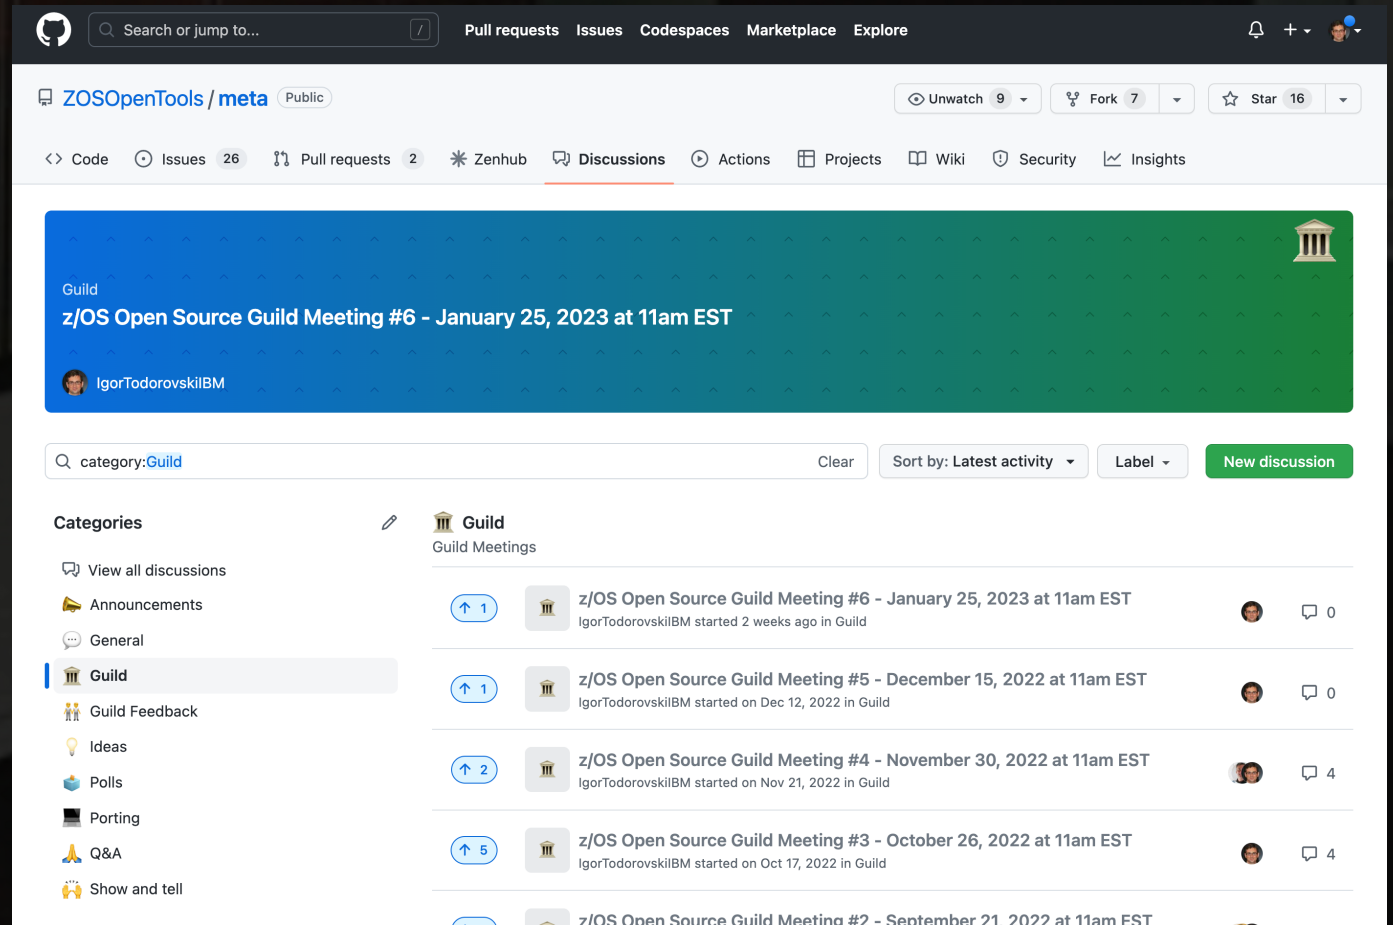

- A review of updates and progress
- Highlights of new zopen features
- Live demonstrations of:
 - Zigi (Lionel Dyck)
 - Man-db (Mike Fulton)
- Digital Badges Proposals
- Polling and feedback
- Q/A

How to access Guild Meetings

All previous and future guild meeting recordings/slides/info are available at <https://github.com/ZOSOpenTools/meta/discussions/categories/guild>

Topics from previous meetings:

- **Guild #1** – Introduction, how to get started
- **Guild #2** – Deep dive into the porting process
- **Guild #3** – Leveraging the zoslib library
- **Guild #4** – zopen-setup, upstreaming, porting example
- **Guild #5** – cmake, ninja, vim
- **Guild #6** – Git and Bash

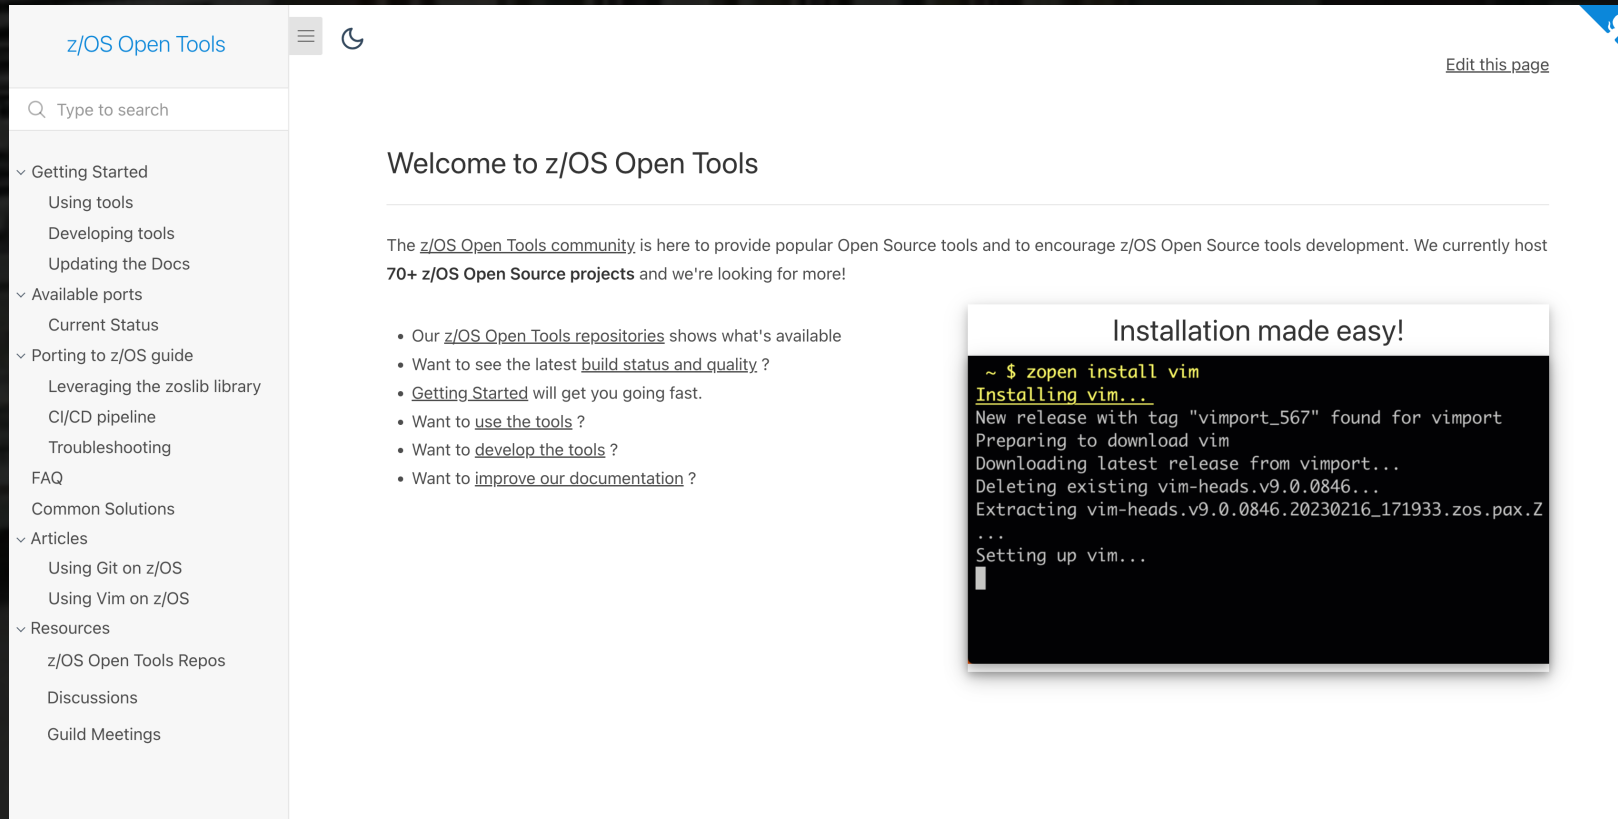

The screenshot shows the GitHub interface for the repository ZOSOpenTools/meta. The 'Discussions' tab is selected, and the 'Guild' category is active. A search bar shows 'category:Guild'. The main content area displays a list of guild meetings, with the most recent one being 'z/OS Open Source Guild Meeting #6 - January 25, 2023 at 11am EST' by IgorTodorovskiIBM. The left sidebar shows the 'Guild' category selected under 'Categories'.

z/OS Open Tools

Q Type to search

- Getting Started
 - Using tools
 - Developing tools
 - Updating the Docs
- Available ports
 - Current Status
- Porting to z/OS guide
 - Leveraging the zoslib library
 - CI/CD pipeline
 - Troubleshooting
- FAQ
- Common Solutions
- Articles
 - Using Git on z/OS
 - Using Vim on z/OS
- Resources
 - z/OS Open Tools Repos
 - Discussions
 - Guild Meetings

Welcome to z/OS Open Tools

The [z/OS Open Tools community](#) is here to provide popular Open Source tools and to encourage z/OS Open Source tools development. We currently host **70+ z/OS Open Source projects** and we're looking for more!

- Our [z/OS Open Tools repositories](#) shows what's available
- Want to see the latest [build status and quality](#) ?
- [Getting Started](#) will get you going fast.
- Want to [use the tools](#) ?
- Want to [develop the tools](#) ?
- Want to [improve our documentation](#) ?

Installation made easy!

```
~ $ zopen install vim
Installing vim...
New release with tag "vimport_567" found for vimport
Preparing to download vim
Downloading latest release from vimport...
Deleting existing vim-heads.v9.0.0846...
Extracting vim-heads.v9.0.0846.20230216_171933.zos.pax.Z
...
Setting up vim...
```

We are looking for contributors to the documentation!

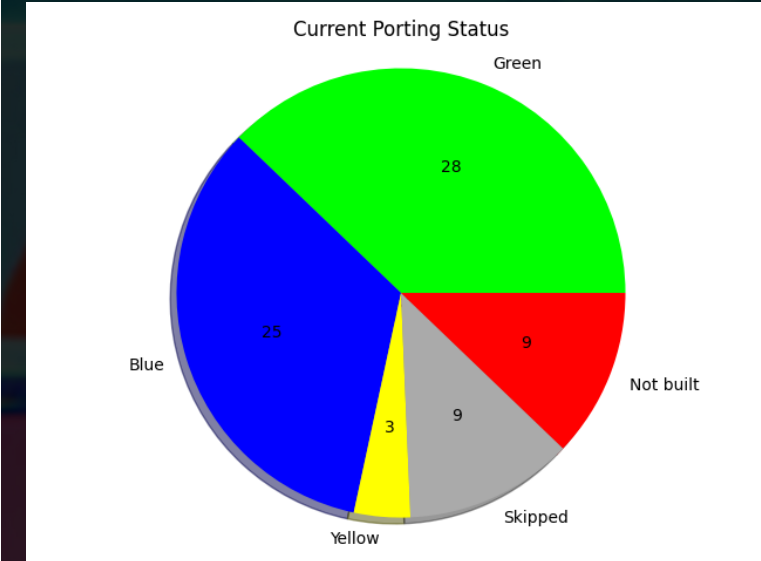

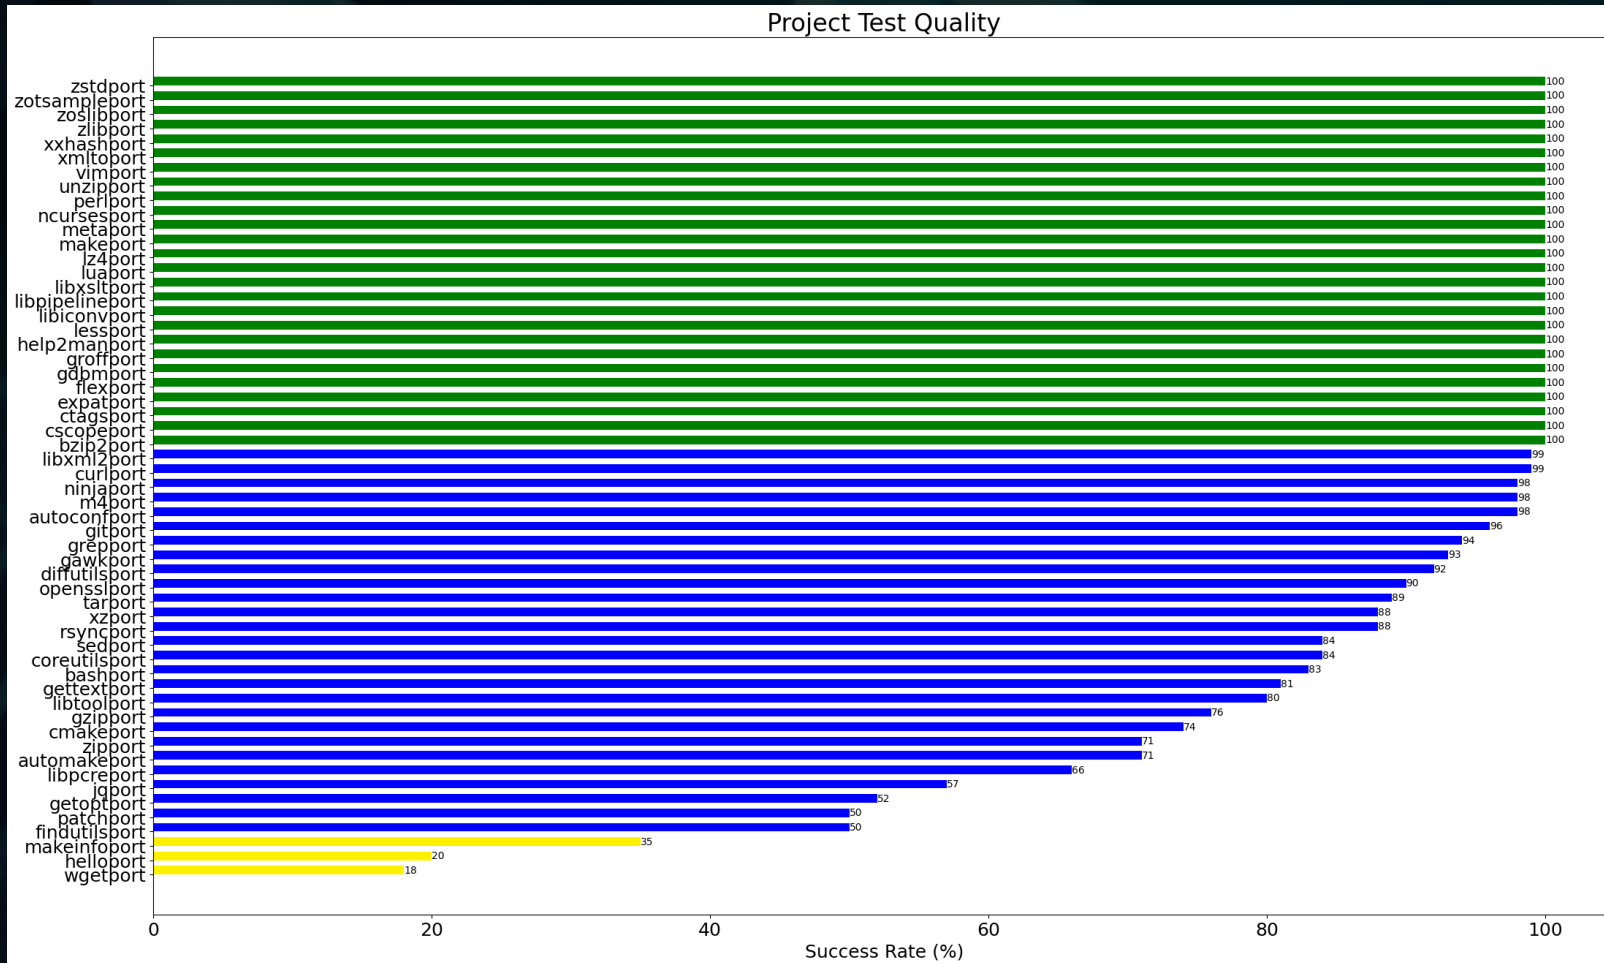

Highlights in z/OS Open Tools

- **New Task-based documentation**
 - <https://zosopentools.github.io/meta>
 - We're continueing to redesign our documentation, if you want to help, let us know!
- **Introducing `zopen install`** (`zopen download` deprecated)
 - `zopen install` will download, extract, and ***now setup the tool too***
 - (Use `--download-only` for the previous behaviour)
- **Need a tool and don't know what it depends on?**
 - **Run-time dependency support has been added**
 - `zopen install` will detect dependencies and install them for you
 - **Do I need to explicitly source each `.env`?**
 - No, the `.env` file will source the dependency's `.env` files.
- **You can now move installed directories**
 - After moving, just make sure re-run `setup.sh`

Demo

What's available under z/OS Open Tools

New tools/libraries: man-db, getopt, libpcres2, libxslt, libxml2

We're always looking for help: <https://zosopentools.link/help-wanted>

Man-Db

```
MAN(1)                                General Commands Manual                                MAN(1)

NAME
    man, apropos, whatis - display online manual documentation pages

SYNOPSIS
    man [-adho] [-t | -w] [-M manpath] [-P pager] [-S mansect] [-m arch[:machine]]
        [-p [eprtv]] [mansect] page ...

    man -f [-d] [-M manpath] [-P pager] [-S mansect] keyword ...
    whatis [-d] [-s mansect] keyword ...

    man -k [-d] [-M manpath] [-P pager] [-S mansect] keyword ...
    apropos [-d] [-s mansect] keyword ...

DESCRIPTION
    The man utility finds and displays online manual documentation pages. If mansect is
    provided, man restricts the search to the specific section of the manual.

    The sections of the manual are:
        1. General Commands Manual
        2. System Calls Manual
        3. Library Functions Manual
        4. Kernel Interfaces Manual
        5. File Formats Manual
        6. Games Manual
        7. Miscellaneous Information Manual
        8. System Manager's Manual
        9. Kernel Developer's Manual

    Options that man understands:

    -M manpath
        Forces a specific colon separated manual path instead of the default search
        path. See manpath(1). Overrides the MANPATH environment variable.
```

Man-db

- **Install command:**
zopen install man
- **View manpages**
 - Example: man make

```
MAKE(1)                                User Commands                                MAKE(1)

NAME
  make - GNU Make utility to maintain groups of programs

SYNOPSIS
  make [OPTION]... [TARGET]...

DESCRIPTION
  The make utility will determine automatically which pieces of a large program need to be recompiled, and issue the commands to recompile them. The manual describes the GNU implementation of make, which was written by Richard Stallman and Roland McGrath, and is currently maintained by Paul Smith. Our examples show C programs, since they are very common, but you can use make with any programming language whose compiler can be run with a shell command. In fact, make is not limited to programs. You can use it to describe any task where some files must be updated automatically from others whenever the others change.

  To prepare to use make, you must write a file called the makefile that describes the relationships among files in your program, and provides commands for updating each file. In a program, typically the executable file is updated from object files, which are in turn made by compiling source files.

  Once a suitable makefile exists, each time you change some source files, this simple shell command:

      make

  suffices to perform all necessary recompilations. The make program uses the makefile description and the last-modification times of the files to decide which of the files need to be updated. For each of those files, it issues the commands recorded in the makefile.

  make executes commands in the makefile to update one or more targets, where target is typically a program. If no -f option is present, make will look for the makefiles GNUmakefile, makefile, and Makefile, in that order.

  Normally you should call your makefile either makefile or Makefile. (We recommend Makefile because it appears prominently near the beginning of a directory listing, right near other important files such as README.) The first name checked, GNUmakefile, is not recommended for most makefiles. You should use this name if you have a makefile that is specific to GNU make, and will not be understood by other versions of make. If makefile is '-', the standard input is read.

  make updates a target if it depends on prerequisite files that have been modified since the target was last modified, or if the target does not exist.

Manual page make(1) line 1 (press h for help or q to quit)
2 bash
```

- **Current issues:**
 - <https://github.com/ZOSOpenTools/man-dbport/issues>

Digital Badges are coming soon!

Goal: to recognize your accomplishments and contributions to z/OS Open Source

Proposed Badge Descriptions:

- **z/OS Open Source Contributor:** Contributed to an z/OS open source project in the last year.
- **z/OS Open Source Creator:** Creator of a z/OS Open Source project, with several commits to the project.
- **z/OS Open Source Port Leader:** Successfully ported and upstreamed z/OS contributions back to the original community.
- **z/OS Open Source High Frequency Contributor:** Contributed over 500 contributions to z/OS related projects.
- **z/OS Open Source Team Player:** Reviewed over 50 pull requests to z/OS related projects in the past year.
- **z/OS Open Source Trail Blazer:** Ported 5 tools or libraries to z/OS in the past year, with a port quality of 90% or above for the test cases provided.
- **z/OS Open Source Manual Laborer:** Contributed 5 PRs to the z/OS Open Tools documentation

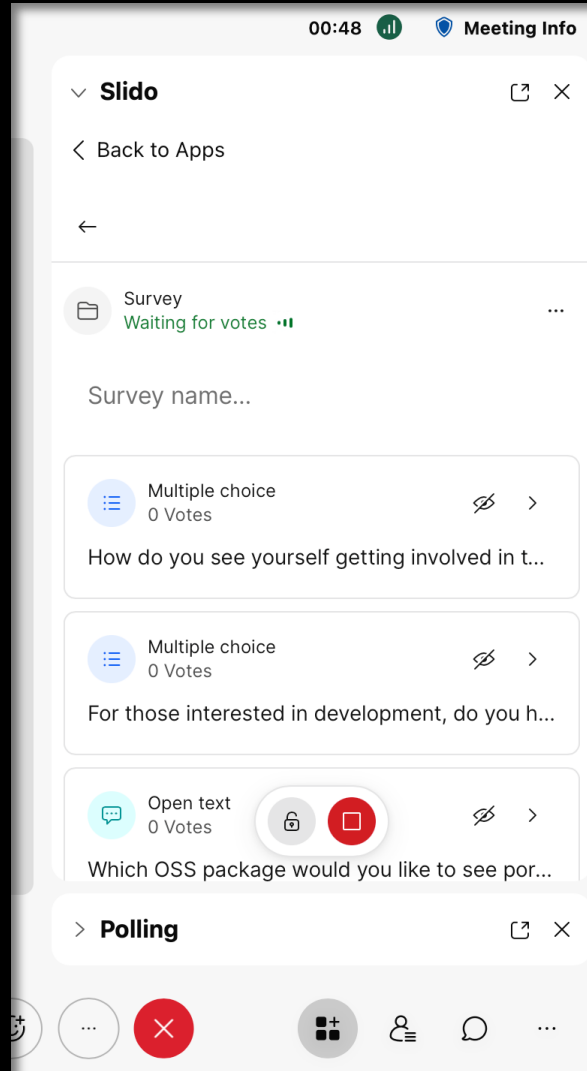

Target Audience: Everyone!

Interested in being part of the badge committee? Discuss here

<https://github.com/ZOSOpenTools/meta/discussions/86>

Survey

You can post feedback in our discussions page as well:

- <https://github.com/ZOSOpenTools/meta/discussions/categories/guild-feedback>

What's we're working on next

- **Improving the documentation**
- **Improving zopen install to install into a single directory**
 - <https://github.com/ZOSOpenTools/meta/discussions/110>
- **Incorporating zoslib into every tool/library**
- **Migrate to the new Clang compiler for build**
- **Getting the Git man-pages working**
 - Needs Docbook2x, AsciiDoc ported
- **Continue to improve quality for various ports and continue to port missing core Linux tools to z/OS**

Thank you!

- **Thank you and welcome to our new contributors!**

- RCOS Students (Maia, Kenny, and Andrew) 
- Lionel Dyck

- **Thank you to our existing contributors!**

- Kai Nacke, Ian Mitchell, Eric Covener, Russell Wilson, Tin Hang To, Erik Janssen, Jeff Shimoda, Sean Perry, Anthony Giorgio, Emily Ratliff, Nate Myers, Fanbo Meng, Doug Burns, Haritha D and many others!

We need your help! How do you get involved?

Get involved either as a creator, or a consumer, of z/OS Open Source Technology

Do you have access to a z/OS machine?

- **Yes:**
 - Then visit to our [Getting Started](#) docs and get started today!
- **No:**
 - Email itodorov@ca.ibm.com or fultonm@ca.ibm.com to be considered for z/OS system access

What should I get started with?

- Visit our discussions page for a list of projects and availabilities:
 - <https://github.com/ZOSOpenTools/meta/discussions>
 - Got an idea or an issue? Create a discussion
- Visit our *help wanted* issues:
<https://github.com/search?q=user%3AZOSOpenTools+repo%3Ahttps%3A%2F%2Fgithub.com%2FZOSOpenTools+label%3A%22help+wanted%22+state%3Aopen&type=issues&ref=advsearch&state=open>

We'll see you next month!
